

### To our valued customers,

Below are some changes to our IntraVUE Software offering. Please carefully review these changes as they will impact your current IntraVUE Software subscription.

#### Official Launch of IntraVUE Edge and 3.2.0

Panduit now offers IntraVUE Edge, part number PNPIV, as an industrial network documentation and monitoring device. The appliance comes pre-installed with a permanent license for the latest version of IntraVUE, 3.2.0. This update includes support of SNMP V3, improved device, and network display capabilities, and security features.

- For more information on these and additional features, please visit the [release notes](#)
- To upgrade your Windows installation to this newest version, click [here](#)
- For more information on IntraVUE Edge, click [here](#)

#### Discontinuation of IntraVUE Server-Based Licensing

Server-based licensing for the IntraVUE Software will be discontinued as of 11/7/2020 with no more orders taken after 11/7/2019. As a part of this transition, we are offering customers currently under contract the opportunity to convert their existing term licenses into perpetual licenses at no additional charge. Please reference the [release form](#) for specific instructions on how to take advantage of this offer.

Please note: all new IntraVUE purchases will be offered as a perpetual license through IntraVUE Edge, part number [PNPIV](#). All support for IntraVUE will continue under Panduit Technical Support.

You can find links to system documentation, instructional videos, white papers, and more by visiting [www.panduit.com/intravue](http://www.panduit.com/intravue).

Thank you,  
The Panduit Industrial Network Infrastructure Team
